Comment. 25X1C

Paragraph 2: Unidentified AAA unit of the Eighth Gds Army

Paragraph 3: 21st Gds Mecz Div.

Paragraph 4: Hq XXVIII Gds Mtz Rifle Corps and 21st Gds Mecz Div.

Paragraph 5: Headquarters engineer unit of the Eighth Gds Army.

Paragraph 6: 57th Gds Mtz Rifle Div.

Paragraph 7: 21st Gds Mecz Div.

Paragraph 8: Engineer units of the GOFG from Potsdam. The two shipments were previously reported by another source. [REDACTED]

Paragraph 9: Truck of the 36th Pon Bridge Regt of the GOFG in Rosslau and sedans of the Hq Second Gds Mecz Army and headquarters units of the Fourth Gds Mecz Army.

25X1A

Paragraph 10: Motor transport unit of the GOFG.

25X1A\*\*\* Comment. The initial stages of the loading operations fairly definitely indicate that the engineer exercise in the Dessau-Aken area, which began on 6 May, ended on 17 May. However, it cannot be determined whether the units returned to their posts or moved to troop training grounds. All reports on this exercise indicate that GOFG units involved included: the 36th Pon Bridge Regt from Dessau-Rosslau; elements of the unidentified engineer regiment from Potsdam; the unidentified artillery division from Potsdam; and an unidentified motor transport unit. Eighth Gds Army components involved in the exercise included army headquarters engineer, artillery, AAA, and rear service units; the Hq XXVIII Gds Mtz Rifle Corps and corps headquarters units; headquarters units of the XXIX Gds Mtz Rifle Corps; most of the components of the 21st Gds Mecz Div; and engineer components of the 57th Gds Mtz Rifle Div. Some officers of the Second and Fourth Gds Mecz Armies probably attended the exercise as observers.

25X1A\*\*\*

Comment. There has been conflicting information on troops in the barracks installation in Rosslau-Meinsdorf since early May 1951. It is believed that the components of the 7th Gds Tank Div from the installation moved to Letzling Heath and that the 36th Pon Bridge Regt of the GOFG participated in the engineer exercise at Aken. However, there is a possibility that other units involved in the engineer exercise may have been temporarily quartered in the installation. [REDACTED]
